Foreword

As guardians of public resources, it is the obligation of every public sector organisation in the UK to fight fraud and corruption. Taking effective measures in counter fraud amounts to much more than simply saving money, as illegitimate activities can undermine the public trust, the very social licence, which is essential to the ability of organisations to operate effectively.

The CIPFA Fraud and Corruption Tracker (CFaCT) survey aims to help organisations, and the public at large, better understand the volume and type of fraudulent activity in the UK and the actions which are being taken to combat it.

With support from the National Audit Office (NAO), the National Crime Agency (NCA) and the Local Government Association (LGA), these insights reflect the current concerns of fraud practitioners from local authorities in a bid to create a focus on trends and emerging risks.

Key findings this year, such as the continued perception of procurement as the area at most susceptible to fraud, and the growing cost of business rates fraud, should help councils allocate resources appropriately to counter such activity.

For this reason, the 2018 CFaCT survey should be essential reading for all local authorities as part of their ongoing risk management activity. It provides a clear picture of the fraud landscape today for elected members, the executive and the professionals responsible for countering fraud, helping their organisations benchmark their activities against counterparts in the wider public sector.

When councils take effective counter fraud measures they are rebuilding public trust, and ensuring our increasingly scarce funds are being used effectively to deliver services.

Rob Whiteman

Chief Executive, CIPFA

The survey was supported by:

The CIPFA Counter Fraud Centre

The CIPFA Counter Fraud Centre (CCFC), launched in July 2014, was created to fill the gap in the UK counter fraud arena following the closure of the National Fraud Authority (NFA) and the Audit Commission. Building on CIPFA's 130-year history of championing excellence in public finance management, we offer training and a range of products and services to help organisations detect, prevent and recover fraud losses.

We lead on the national counter fraud and anti-corruption strategy for local government, Fighting Fraud and Corruption Locally, and were named in the government's Anti-Corruption Plan (2014) as having a key role to play in combatting corruption, both within the UK and abroad.

Acknowledgements

CIPFA would like to thank all the organisations that completed the survey along with those that helped by distributing the survey or contributing case studies/best practices, including:

- Local Government Association
- Solace
- Home Office
- The Fighting Fraud and Corruption Locally board
- Salford City Council
- Sandwell Council

Introduction

CIPFA recognises that each pound lost to fraud represents a loss to the public purse and reduces the ability of the public sector to provide services to people who need them. According to the Annual Fraud Indicator 2013, which provides the last set of government sanctioned estimates, fraud costs the public sector at least £20.6bn annually and of this total, £2.1bn is specifically in local government.

Fraud continues to pose a major financial threat to local authorities and working with partners such as the LGA and Home Office, we are seeing an emerging picture of resilience and innovation within a sector that is aware of the difficulties it faces and is finding solutions to the challenges.

In May 2018, CIPFA conducted its fourth annual CFaCT survey, drawing on the experiences of practitioners and the support and expertise of key stakeholders to show the changing shape of the fraud landscape. This survey aims to create a national picture of the amount, and types of fraud carried out against local authorities.

The results were received from local authorities in all regions in the UK, allowing CIPFA to estimate the total figures for fraud across England, Scotland, Wales and Northern Ireland.

Response rate

This report highlights the following:

- the types of fraud identified in the 2017/18 CFaCT survey
- the value of fraud prevented and detected in 2017/18
- how to improve the public sector budget through counter fraud and prevention activities
- how the fraud and corruption landscape is changing including emerging risks and threats.

Executive summary

CIPFA has estimated that for local authorities in the UK, the total value of fraud detected or prevented in 2017/18 is £302m, which is less than the £336m estimated in 2016/17. The average value per fraud has also reduced from £4,500 in 2016/17 to £3,600 in 2017/18.

Respondents report that approximately 80,000 frauds had been detected or prevented in 2017/18, which is a slight increase from just over 75,000 frauds in 2016/17. The number of serious and organised crime cases, however, has doubled since 2016/17. This increase may

suggest that fraud attacks are becoming more complex and sophisticated due to fraud teams becoming more effective at prevention. Alternatively, fraud teams may have developed a more effective approach for detecting or preventing such frauds.

Estimated value of fraud detected/prevented

The largest growing area is business rate fraud

Detected fraud by estimated volume

For 2017/18, it has been highlighted that the three greatest areas of perceived fraud risk are procurement, council tax single person discount (SPD) and adult social care.

The largest growing area is business rates fraud, with an estimated £10.4m lost in 2017/18 compared to £4.3m in 2016/17. This is followed by disabled parking concession (Blue Badge) which has increased by £3m to an estimated value of £7.3m for cases prevented/detected in 2017/18.

Two thirds of identified frauds related to council tax fraud (66%), with a value of £9.8m, while the highest

value detected/prevented from investigations was housing fraud, totalling £97.4m.

None of the respondents reported any issues with needing greater public support for tackling fraud, but some agreed that there needs to be an increased priority given within councils to tackling fraud.

Historically, it is shown that the more effective and efficient authorities are at detecting and preventing fraud, the more they will discover. This means that even if the levels of detection and prevention have increased, this is more likely due to a greater emphasis towards battling fraud rather than weak controls.

Main types of fraud

The 2017/18 CFaCT survey indicates that there are four main types of fraud (by volume) that affect local authorities:

1. council tax
2. housing
3. disabled parking (Blue Badge)
4. business rates.

Council tax

Council tax fraud has consistently been the largest reported issue over the last four years. As the revenue forms part of the income for local authorities, there is a clear correlation between council tax fraud and a reduction in the available budget.

It has traditionally been an area of high volume/low unit value, and this year's results reflect that trend. Council tax fraud represents the highest number of fraud cases reported by local authorities (66%), however, the total value of the fraud, estimated at £26.3m in 2017/18, accounts for only 8.7% of the value of all detected fraud.

The number of detected/prevented cases in the area of council tax SPD has reduced from 2016/17 levels, but we see a rise in the number of incidents and value in council tax reduction (CTR) and other forms of council tax fraud.

Estimated council tax fraud

	2016/17		2017/18	
	Volume	Value	Volume	Value
SPD	50,136	£19.5m	46,278	£15.8m
CTR	6,326	£4.8m	8,759	£6.1m
Other	674	£1.1m	2,857	£4.5m
Total	57,136	£25.5m	57,894	£26.3m

Council tax fraud represents the highest number of fraud cases reported, but only 8.7% of the detected value.

Housing and tenancy fraud

Housing is expensive in many parts of the country, particularly in the South East of England, and therefore a low number of cases produces a high value in terms of fraud. However, councils record the income lost to housing fraud using different valuations, ranging from a notional cost of replacing a property set by the National Fraud Initiative (NFI) to the average cost for keeping a family in bed and breakfast accommodation for a year.

The difference in approach can lead to substantial differences. For example, two years ago, the NFI increased its standard notional figure to include other elements, and this increased the figure to £93,000, which is substantially larger than the previous figure of £18,000. This means that authorities may be using differing notional figures to calculate their average valuation of loss, which in turn leads to variations.

As housing has become increasingly expensive, the value of right to buy fraud is evidently higher than the other types of housing fraud. The value of this type of fraud is higher in London than in other parts of the country, with an estimated average of £72,000 per case compared to the rest of the UK combined, which has an estimated total of £50,000 per case.

However, the overall value and value of right to buy fraud has continued to decline – see table below.

Estimated housing fraud

Type of fraud	2016/17		2017/18	
	Volume	Value	Volume	Value
Right to buy	1,284	£111.6m	1,518	£92.0m
Illegal sublet	1,829	£78.5m	1,051	£55.8m
Other*	2,825	£73.3m	2,164	£68.3m
Total	5,938	£263.4m	4,733	£216.1m

*Other includes tenancy fraud that are neither right to buy nor illegal sublet, and may include succession and false applications.

Disability Faculty Grant and housing fraud

Ms C used her disabled child as a means of requesting money from the local authority to fit a downstairs bathroom in their home. This request was rejected but Ms C appealed and the matter was taken to court where it was revealed that she owned multiple properties and was actually living in a different county, where she was also claiming disability benefits. The appeal was denied and Ms C was instructed to pay over £16,000 in court costs within half a year.

Since 2016/2017, right to buy value has decreased by

18%

£216m

the estimated total value loss from housing fraud investigated during 2017/18

Disabled parking (Blue Badge)

Fraud from the misuse of the Blue Badge scheme has increased for the first time since CIPFA began running the survey, with the number of cases rising by over 1,000 between 2016/17 and 2017/18. The survey also indicates that 49% of Blue Badge fraud cases in 2017/18 were reported by counties.

There is no standard way to calculate the value of this type of fraud and some authorities, for example in London, place a higher value on the loss than others and invest more in counter fraud resource.

The cost of parking in London results in a higher value to case ratio, which is shown in the average value per case reported – £2,150 in comparison to counties who had an average of £449 per case.

In the event that a Blue Badge misuse is identified, the offender is often prosecuted and fined (which is paid to the court). Costs are awarded to the prosecuting authority but these may not meet the full cost of the investigation and prosecution, resulting in a loss of funds. This potential loss could explain why authorities do not focus as much attention on this type of fraud.

Blue Badge fraud is often an indicator of other benefit-related frauds, such as concessionary travel or claims against deceased individuals by care homes for adult social care.

49%

of Blue Badge fraud cases in 2017/18 were reported by counties

The average value per case reported is:

£2,150

in London

£449

in counties

Business rates

Business rates are a key cost for those who have to pay the tax and is the largest growing risk area in 2017/18; district councils have identified this as their fourth biggest fraud risk area for 2017/18 after housing fraud, council tax and procurement.

Business rates fraud represented 0.9% of the total number of frauds reported in 2016/17, with an estimated

value of £7m. In 2017/18, this increased to 1.7%, with an estimated value of £10.4m.

The rise in the number and value of fraud detected/prevented since 2016/17 could be as a result of more authorities participating in business rates data matching activities, uncovering more cases of fraud that had previously gone unnoticed.

Data matching uncovers business rates fraud

The fraud team at Salford City Council undertook a business rates data matching exercise with GeoPlace. They used geographical mapping and other datasets to identify businesses that were not on the ratings list and were hard to find. The results identified seven potential business and the cases were sent to the Valuation Office Agency. Of the three returned to date, one attracted small business rate relief and rates on the other two were backdated to 2015, generating a bill of £90,000.

Other types of fraud

Fraud covers a substantial number of areas and within organisations these can vary in importance. This part of the report looks at specific areas of fraud that did not appear as major types of fraud within the national picture but are important to individual organisations. These include the following fraud types:

- adult social care
- insurance
- procurement
- no recourse to public funds/welfare assistance
- payroll, recruitment, expenses and pension
- economic and voluntary sector support and debt
- mandate fraud and manipulation of data.

Adult social care

The estimated value of adult social care fraud cases has increased by 21%, despite a fall in the average value per case – £9,000 in 2017/18 compared to £12,500 in 2016/17. This is a product of the significant rise in the number of frauds within adult social care which are not related to personal budgets. In recent years, many local authorities have funded training and introduced robust controls to mitigate the risk of fraud within personal budgets, which has resulted in a reduction of the estimated value per case to under £9,800 in 2017/18 compared to over £10,000 in 2016/17.

This year's survey also highlights a decline in the number of adult social care insider fraud cases, with 2% of cases involving an authority employee, compared to 5% last year.

Estimated adult social care fraud

Type of fraud	2016/17		2017/18	
	Volume	Value	Volume	Value
Personal budget	264	£2.7m	334	£3.2m
Other	182	£2.8m	403	£3.5m
Total	446	£5.5m	737	£6.7m
Average value per fraud		£12,462		£9,123

Insurance fraud

The number of insurance frauds investigated has decreased to 117 with an average value of over £12,000, which explains the significant decline also in the total value of fraud detected/prevented. The total estimated value of loss in 2017/18 is £3.5m compared to £5.1m in 2016/17.

Respondents who identified insurance fraud also reported two confirmed serious and organised crime cases and two insider fraud cases.

Considerable work has been done in the area of insurance fraud, and insurance companies are working with organisations to develop new ways to identify fraud and abuse within the system, which seems to be effective given the steady decline in volume and value of cases reported.

The Insurance Fraud Bureau was one of the first to use a data analytical tool to identify fraud loss through multiple data sources in the insurance sector. This best practice is now being applied to local government, for example by the London Counter Fraud Hub, which is being delivered by CIPFA.

Procurement fraud

In last year's survey procurement was seen as one of the greatest areas of fraud risk and this remains the same for 2017/18.

Procurement fraud takes place in a constantly changing environment and can occur anywhere throughout the procurement cycle. There can be significant difficulties in measuring the value of procurement fraud since it is seldom the total value of the contract but an element of the contract involved. The value of the loss, especially post award, can be as hard to measure but equally significant.

In 2016/17, there was an estimated 197 prevented or detected procurement frauds with an estimated value of £6.2m, which has now decreased to 142 estimated fraudulent cases with an estimated value of £5.2m. Twenty-five percent of reported cases were insider fraud and a further 20% were serious and organised crime.

Estimated procurement fraud

2016/17		2017/18	
Volume	Value	Volume	Value
197	£6.2m	142	£5.2m

CIPFA is working with the Ministry of Housing, Communities and Local Government (MHCLG) in an effort to understand more about procurement fraud and how we can develop more solutions in this area.

The [Fighting Fraud and Corruption Locally Strategy 2016 to 2019 \(FFCL\)](#) recommends that local authorities have a procurement fraud map and use it to define the stages at which procurement fraud can happen. This enables authorities to highlight low, medium and high potential risks and inform risk awareness training for the future.

The Competition and Markets Authority has produced a [free online tool](#) that studies the data fed in against bidder behaviour and price patterns, allowing the public sector to identify areas of higher risk within procurement. It then flags areas where there could be potential fraud and which should be investigated.

Welfare assistance and no recourse to public funds

In 2016/17 the estimated number of fraud cases related to welfare assistance was 74, increasing to an estimated 109 in 2017/18.

The number of cases in no recourse to public funding cases has reduced to an estimated 334 in 2017/18. The value of the average fraud has more than halved, falling to an estimated £11,500 in 2017/18 from £28,100 in 2016/17. This is reflected by the overall decrease in total value of the fraud to an estimated £4.3m.

Economic and voluntary sector (grant fraud) and debt

As funds become more limited for this type of support, it is even more important for fraud teams to be aware of the risks within this area.

In the 2016/17 survey, there were 17 actual cases of grant fraud reported, which increased to 24 cases with an average estimated loss of £14,000 per case for 2017/18.

Debt had 38 reported cases in 2017/18 valued at over £150,000, with one case of insider fraud.

Payroll, expenses, recruitment and pension

If we combine all the estimated results for these four areas, the total value of the fraud loss is an estimated £2.1m.

Measuring the cost of these frauds can be quite difficult as they carry implications that include reputational damage, the costs of further recruitment and investigations into the motives behind the fraud. As a result, some organisations could be less likely to investigate or report investigations in these areas.

Payroll has the highest volume and value of fraud out of these four areas for 2017/18, and 51% of the cases investigated or prevented were reported as insider fraud.

Recruitment fraud has the second highest estimated average per case of £9,400. This is quite an interesting area for fraud practitioners given their work is often not recorded as a monetary value as the application is refused or withdrawn. So, it is more likely the figure represents the estimated cases of fraud that were prevented in 2017/18.

Estimated fraud

	2016/17		2017/18	
Type	Volume	Value	Volume	Value
Payroll	248	£1.0m	167	£1.01m
Expenses	75	£0.1m	34	£0.03m
Recruitment	46	£0.2m	52	£0.49m
Pension	228	£0.8m	164	£0.57m
Total	597	£2.1m	417	£2.10m

Manipulation of data (financial or non-financial) and mandate fraud

CIPFA estimates that across the UK there have been 23 cases of manipulation of data fraud, which is less than half of the estimated cases in 2016/17.

There were 257 estimated cases of mandate fraud in 2017/18 compared to 325 estimated cases detected or prevented in 2016/17.

These areas of fraudulent activity are on the decline and advice from organisations such as Action Fraud is useful.

Serious and organised crime

The survey question on serious and organised crime was requested by the Home Office and was included in the 2017/18 survey in order to help establish how it is being tackled by local authorities.

Organised crime often involves complicated and large-scale fraudulent activities which cross more than one boundary, such as payroll, mandate fraud, insurance claims, business rates and procurement. These activities demand considerable resources to investigate and require organisations to co-operate in order to successfully bring criminals to justice.

The 2017/18 survey identified 56 cases of serious and organised crime which was over double the figures reported in 2016/17 – 93% of these cases were reported by respondents from metropolitan unitaries. This shows that in the bigger conurbations, there is higher serious and organised crime activity (as one would expect) which is why some of the emerging counter fraud hubs are using predictive analytics to detect organised crime.

The responses indicate that organisations share a great deal of data both internally and externally – 34% share with the police and 16% share with similar organisations (peers). In addition, of the organisations that responded, 47% identified serious and organised crime risks within their organisation's risk register.

93%

the percentage of respondents who share data externally

Key data sharing partners are the police and other similar organisations.

Whistleblowing

This year, 74% of respondents said that they annually reviewed their whistleblowing arrangements in line with PAS 1998:2008 Whistleblowing Arrangements Code of Practice.

Of those questioned, 87% confirmed that staff and the public had access to a helpdesk and 71% said that the helpline conformed to the BS PAS 1998:2008. Respondents reported a total of 560 whistleblowing

cases, made in line with BS PAS 1998:2008; representing disclosures in all areas, not just with regard to suspected fraudulent behaviour.

Resources and structure

Fraud teams are detecting and preventing more frauds despite reductions in their resources. It is therefore unsurprising to see 14% of respondents have a shared services structure; this approach has gained popularity in some areas as a method of allowing smaller organisations to provide a service that is both resilient and cost effective.

We have also seen a rise in authorities who have a dedicated counter fraud team – from 35% in 2016/17 to 51% in 2017/18. It is worth noting that there may be a potential bias in this figure as those who have a dedicated counter fraud team are more likely and able to return data for the CFaCT survey.

For organisations that do not go down the shared service route, the 2017/18 survey showed no growth in staff resources until 2020. This position would appear to be a

change from 2016 when some respondents had hoped to increase their staff numbers.

The number of available in-house qualified financial investigators has dipped slightly from 34% in 2016/17 to 31% in 2017/18. In addition, the percentage of authorities that do not have a qualified financial investigator increased from 35% in 2016/17 to 41% in 2017/18, which continues to show that resources for fraud are stretched.

Sanctions

Below are some of the key findings regarding sanctions:

- 636 prosecutions were completed in 2017/18 and of these, 15 were involved in insider fraud and 14 of those were found guilty
- the number of cautions increased from 9% in 2016/17 to 13% in 2017/18
- the percentage of other sanctions dropped from 53% in 2016/17 to 46% in 2017/18.

Outcome of sanctions

Fighting Fraud and Corruption Locally

The Fighting Fraud and Corruption Locally Strategy 2016–2019 (FFCL Strategy) was developed by local authorities and counter fraud experts and is the definitive guide for local authority leaders, chief executives, finance directors and all those with governance responsibilities.

The FFCL Strategy is available for councils to use freely so that everyone can benefit from shared good practice and is aimed at local authority leaders. It provides advice on how to lead and communicate counter fraud and corruption activity for the greatest impact, as well as covering resource management and investment in counter fraud operations.

The FFCL Board put forward specific questions to be included in the CFaCT survey to help measure the effectiveness of the initiatives in the FFCL Strategy and the responses are reflected in the diagrams below. The more confident respondents are about how fraud is dealt with in their organisation, the higher they marked the statement; the lower scores are towards the centre of the diagram.

Counter fraud controls by country

Over the past four years the same three issues have arisen when we have asked the question: *what are the three most significant issues that need to be addressed to effectively tackle the risk of fraud and corruption at your organisation?* These are:

- capacity
- effective fraud risk management
- better data sharing.

The FFCL's 34 point checklist covers each one of these areas and provides a comprehensive framework that can be used to address them. It can be downloaded from the [CIPFA website](#).

The FFCL Strategy recommends that:

There is an annual fraud plan which is agreed by committee and reflects resources mapped to risks and arrangements for reporting outcomes. This plan covers all areas of the local authority's business and includes activities undertaken by contractors and third parties or voluntary sector activities.

By producing a plan and resources that is agreed by the leadership team, management are able to see gaps in capacity and identify areas of risk which enables them to make effective strategic decisions.

Last year, 10% of respondents did not know when their counter fraud and corruption plan was last approved, and this year this has dropped slightly to 9%. Of those who responded to the survey, 56% agreed their counter fraud and corruption plan was approved within the last 12 months, and 21% stated that their plan would be approved post 2017/18.

When did you last have your counter fraud and corruption plan approved?

CIPFA Recommends

- Public sector organisations need to remain vigilant and determined in identifying and preventing fraud in their procurement processes. Our survey showed this to be one of the prime risk areas and practitioners believe this fraud to be widely underreported.
- Effective practices on detecting and preventing adult social care fraud should be shared and adopted across the sector. Data matching is being used by some authorities with positive results.
- All organisations should ensure that they have a strong counter-fraud leadership at the heart of the senior decision-making teams. Fraud teams and practitioners should be supported in presenting business cases to resource their work effectively.
- Public sector organisations should continue to maximise opportunities to share data and to explore innovative use of data, including sharing with law enforcement.
- The importance of the work of the fraud team should be built into both internal and external communication plans. Councils can improve their budget position and reputations by having a zero-tolerance approach.

Appendix 1: Fraud types and estimated value/volume

The table below shows the types of frauds reported in the survey and the estimated volume and value during 2017/18.

Types of fraud	Fraud cases	% of the total	Value	% of the total value	Average
Council tax	57,894	70.0%	£26.3m	8.72%	£455
Disabled parking concession	14,714	17.8%	£7.3m	2.43%	£499
Housing	4,722	5.7%	£215.7m	71.43%	£45,677
Business rates	1,373	1.7%	£10.4m	3.45%	£7,580
Other fraud	1,165	1.4%	£10.9m	3.61%	£9,355
Adult social care	737	0.9%	£6.7m	2.23%	£9,124
No recourse to public funds	378	0.5%	£4.3m	1.43%	£11,445
Schools frauds (excl. transport)	285	0.3%	£0.7m	0.24%	£2,537
Insurance claims	281	0.3%	£3.5m	1.15%	£12,317
Mandate fraud	257	0.3%	£6.6m	2.18%	£25,618
Payroll	167	0.2%	£1.0m	0.33%	£6,030
Pensions	164	0.2%	£0.6m	0.19%	£3,492
Procurement	142	0.2%	£5.2m	1.71%	£36,422
Welfare assistance	109	0.1%	£0.0m	0.01%	£337
Debt	91	0.1%	£0.4m	0.12%	£3,948
Children social care	59	0.1%	£0.9m	0.31%	£15,800
Economic and voluntary sector support	57	0.1%	£0.8m	0.26%	£13,467
Recruitment	52	0.1%	£0.5m	0.16%	£9,510
Expenses	34	0.0%	£0.2m	0.01%	£867
School transport	30	0.0%	£0.1m	0.04%	£3,857
Manipulation of data	23	0.0%	N/A	N/A	N/A
Investments	2	0.0%	£0.0m	—	—

Appendix 2: Methodology

This year's results are based on responses from 144 local authorities. An estimated total volume and value of fraud has been calculated for all local authorities in England, Wales, Scotland and Northern Ireland. Missing values are calculated according to the size of the authority. For each type of fraud, an appropriate universal measure of size has been selected such as local authority housing stock for housing frauds.

From the responses, the number of cases per each unit of the measure is calculated and used to estimate the missing values. Then, for each missing authority, the estimated number of cases is multiplied by the average value per case provided by respondents to give an estimated total value. As an illustration, if the number of

housing frauds per house is 0.01 and a missing authority has 1,000 houses in its housing stock, we estimate the number of frauds as 10. If the average value per case is £100,000 then the total estimated value of fraud for that authority is £1m.

Appendix 3: Glossary

Adult social care fraud

Adult social care fraud can happen in a number of ways but the increase in personal budgets gives a greater opportunity for misuse.

Investigations cover cases where:

- direct payments were not being used to pay for the care of the vulnerable adult
- care workers were claiming money for time they had not worked or were spending the allocated budget inappropriately.

Blue Badge fraud

The Blue Badge is a Europe-wide scheme allowing holders of the permit to parking concessions which are locally administered and are issued to those with disabilities in order that they can park nearer to their destination.

Blue Badge fraud covers abuse of the scheme, including the use of someone else's Blue Badge, or continuing to use or apply for a Blue Badge after a person's death.

Business rates fraud

Business rates fraud is not a transparent landscape for the fraud investigator, with legislation making it difficult to separate between evasion and avoidance. Business rates fraud covers any fraud associated with the evasion of paying business rates including, but not limited to, falsely claiming relief and exemptions where not entitled.

Cautions

Cautions relate to a verbal warning given in circumstances where there is enough evidence to prosecute, but it is felt that it is not in the public interest to do so in that instance.

Council tax fraud

Council tax is the tax levied on domestic properties and collected by district and unitary authorities in England and Wales and levying authorities in Scotland.

Council tax fraud is split into three sections.

- **council tax single person discount (SPD)** – where a person claims to live in a single-person household when more than one person lives there
- **council tax reduction (CTR) support** – where the council tax payer claims incorrectly against household income
- **other types of council tax fraud** – eg claims for exemptions or discounts to which the council tax payer has no entitlement.

Debt fraud

Debt fraud includes fraudulently avoiding a payment of debt to an organisation, excluding council tax discount.

Disciplinary outcomes

Disciplinary outcomes relate to the number of instances where as a result of an investigation by a fraud team, disciplinary action is undertaken, or where a subject resigns during the disciplinary process.

Economic and voluntary sector (grant fraud)

This type of fraud relates to the false application or payment of grants or financial support to any person and any type of agency or organisation.

Housing fraud

Fraud within housing takes a number of forms, including sub-letting for profit, providing false information to gain a tenancy, wrongful tenancy assignment and succession, failing to use the property as the principle home, abandonment, or right to buy.

Insurance fraud

This fraud includes any insurance claim that is proved to be false, made against the organisation or the organisation's insurers.

Mandate fraud

Action Fraud states that: "mandate fraud is when someone gets you to change a direct debit, standing order or bank transfer mandate, by purporting to be an organisation you make regular payments to, for example a subscription or membership organisation or your business supplier".

Manipulation of data fraud

The most common frauds within the manipulation of data relate to employees changing data in order to indicate better performance than actually occurred and staff removing data from the organisation. It also includes individuals using their position to change and manipulate data fraudulently or in assisting or providing access to a family member or friend.

No recourse to public funds fraud

No recourse to public funds prevents any person with that restriction from accessing certain public funds. A person who claims public funds despite such a condition is committing a criminal offence.

Organised crime

The Home Office defines organised crime as "including drug trafficking, human trafficking and organised illegal immigration, high value fraud and other financial crimes, counterfeiting, organised acquisitive crime and cyber crime".

Procurement fraud

This includes any fraud associated with the false procurement of goods and services for an organisation by an internal or external person(s) or organisations in the 'purchase to pay' or post contract procedure, including contract monitoring.

Right to buy

Right to buy is the scheme that allows tenants that have lived in their properties for a qualifying period the right to purchase the property at a discount.

Welfare assistance

Organisations have a limited amount of money available for welfare assistance claims so the criteria for applications are becoming increasingly stringent. Awards are discretionary and may come as either a crisis payment or some form of support payment.

Whistleblowing

Effective whistleblowing allows staff or the public to raise concerns about a crime, criminal offence, miscarriage of justice or dangers to health and safety in a structured and defined way. It can enable teams to uncover significant frauds that may otherwise have gone undiscovered. Organisations should therefore ensure that whistleblowing processes are reviewed regularly.
