## THE REPORT

1. Sickness Absence/Occupational Health Referral Statistics October to December 2011 and 2010.
1.1 The sickness absence outturn for the third quarter of 2011 (October to December) is shown below, with comparisons for the same period during 2010:

| Oct-Dec 2011 | Oct-Dec 2010 |
| :---: | :---: |
| 2.42 days per FTE | 2.01 days per FTE |

The target for October to December 2011 was 2 days per FTE. The year to date outturn is 6.44 days per FTE against a target of 6 days per FTE.

A breakdown of these figures by Department and Long Term/Short Term Sickness Absence is provided at page 18 for information.

The overall sickness figure is higher than last year's figure and worse than the target. This is due to an increase of 148.4 working days due to long term sickness, and 16 days due to short term sickness. The vast majority of the increase in long term sickness has occurred within the Contact Centre service, which also has high levels of short term sickness absence.

|  | Long Term | Short Term |
| :--- | :---: | :---: |
| Oct-Dec 2011 | 1.36 days per FTE | 1.06 days per FTE |
| Oct-Dec 2010 | 1.00 days per FTE | 1.02 days per FTE |

The departmental breakdown of sickness absence has been referred to Directors/Heads of Service to deal with any adverse trends in their Directorates/Departments in relation to short term sickness absence.
1.3 The outcome of occupational health referrals for the third quarter of 2011, with comparisons for the same period during 2010 are shown below:
