

### **Motion submitted by Councillor Peter Roberts**

In order to lead the way in reducing air pollution caused by road traffic and promote flexible working Members should be encouraged to have fewer in person meetings. This not only would help the environment, but also potentially reduce expenditure on travel expenses within the Members' Allowance Scheme. I move that Members agree to note that they may voluntarily waiver their right for travel expenses for attendance at in person meetings, and Council pledges to provide more virtual options for Member attendance at informal meetings without the need for travelling to the Arc.
